

E Saleem Shipping — Website Architecture Plan

1. Project Overview

Item	Detail
Project	Saleem Shipping — International Logistics Website
Type	Static multi-page corporate website
Tech Stack	HTML5, CSS3, Vanilla JavaScript
Pages	Home, About Us, Services, Contact Us
Design Style	Premium cinematic enterprise SaaS UI/UX
Target	International B2B shipping & logistics clients

2. Directory Structure

e:\saleem shipping\	
— index.html	# Homepage (primary landing page)
— about.html	# About Us page
— services.html	# Services page
— contact.html	# Contact Us page
— css/	
— variables.css	# Design tokens & CSS custom properties
— base.css	# Reset, typography, loader, navbar, hero, particles
— sections.css	# Homepage sections, footer, WhatsApp button
— pages.css	# Inner page styles, responsive breakpoints
— js/	
— main.js	# All JavaScript: animations, interactions, logic
— assets/	# Images, icons, media (future use)

3. High-Level Architecture

graph TB	
subgraph "Browser / Client"	
A["index.html (Homepage)"]

A --> VID	
B --> USP	
D --> GM	

4. CSS Architecture

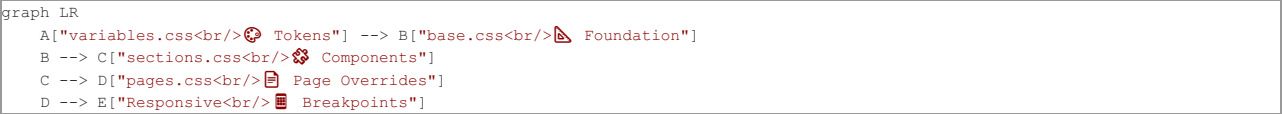

4.1 Design Token System — [variables.css](file:///e:/saleem%20shipping/css/variables.css)

All visual constants are centralized as CSS custom properties for consistency:

Category	Tokens
Colors	--navy, --navy-light, --navy-mid, --white, --orange, --orange-glow, --orange-dark
Glass Effects	--glass-bg, --glass-border, --glass-bg-light
Shadows	--shadow-sm, --shadow-md, --shadow-lg, --shadow-glow

Border Radius --radius-sm (8px), --radius-md (16px), --radius-lg (24px)
Transitions --transition (0.4s cubic-bezier), --transition-fast (0.2s ease)
Typography --font-heading (Outfit), --font-body (Inter)
Layout --container (1280px)

4.2 Style Layer Hierarchy

File	Responsibility
variables.css	Color palette, spacing, typography, shadows, transitions
base.css	Reset, typography scale, loader, navbar, hero section, particles, buttons
sections.css	Services grid, why-choose cards, stats, shipping banner, testimonials, CTA, footer, WhatsApp
pages.css	Page hero banner, about page, services detail, contact form, timeline, responsive breakpoints

4.3 Responsive Breakpoints

Breakpoint	Target
≤ 1024px	Tablets — grids collapse to single column
≤ 768px	Mobile — hamburger nav, adjusted typography, simplified layouts
≤ 480px	Small mobile — stacked buttons, single-column everything

5. JavaScript Architecture

[main.js](file:///e:/saleem%20shipping/js/main.js) — Module Breakdown

5.1 Feature Details

Feature	Trigger	Behavior
Loader	window.load	Shows animated ship + progress bar → fades out after 2.2s
Navbar	scroll event	Adds .scrolled class at 50px → glass blur + solid background
Hamburger	click	Toggles .active on nav-links for mobile slide-in menu
AOS (Custom)	IntersectionObserver	Detects elements with data-aos attr → applies fade/slide/zoom transitions
Stats Counter	IntersectionObserver	Counts from 0 to target value with eased animation over 2s
Testimonial Slider	setInterval (5s)	Auto-advances slides, dot click for manual control
Particles	DOM creation	Generates random floating particles in hero and CTA sections
Hero Text	setTimeout	Staggered reveal of hero content children after loader
3D Tilt	mousemove	Service cards rotate based on cursor position (perspective 800px)
Contact Form	submit	Prevents default, shows send animation, resets after 2.5s
Parallax	scroll	Hero background translates at 0.3× scroll speed
Mouse Glow	mousemove	Radial gradient follows cursor on hero section

5.2 Custom AOS Animation Types

data-aos Value	Transform Applied
fade-up	translateY(40px) → none
fade-down	translateY(-40px) → none
fade-left	translateX(40px) → none
fade-right	translateX(-40px) → none
zoom-in	scale(0.9) → none
flip-up	perspective(500px) rotateX(10deg) → none

[NOTE]
The AOS system is custom-built using IntersectionObserver — no external library dependency. Supports data-aos-delay for staggered animations.

6. Page Architecture

6.1 Homepage — [index.html](file:///e:/saleem%20shipping/index.html)

```
graph TD
  A["📺 Loader"] --> B["🔗 Navbar"]
  B --> C["🎬 Hero Section<br/>Video BG + Particles + CTA"]
  C --> D["📋 Services Overview<br/>5 Glassmorphism Cards"]
  D --> E["✅ Why Choose Us<br/>4 Icon Cards"]
  E --> F["📊 Stats Counter<br/>4 Animated Numbers"]
  F --> G["🚢 Shipping Banner<br/>Animated Ship + Waves"]
  G --> H["🗨️ Testimonials<br/>3-Slide Auto Carousel"]
  H --> I["🔗 CTA Section<br/>Particles + Buttons"]
  I --> J["📄 Footer<br/>4-Column Grid + Newsletter"]
  J --> K["💬 WhatsApp FAB"]
```

6.2 About Us — [about.html](file:///e:/saleem%20shipping/about.html)

```
graph TD
  A["🔗 Navbar"] --> B["📄 Page Hero<br/>Breadcrumb + Title"]
  B --> C["📖 Company Intro<br/>Image + Text + Features"]
  C --> D["🎯 Mission & Vision<br/>2 Glass Cards"]
  D --> E["📅 Timeline<br/>6 Milestones (2009-2024)"]
  E --> F["📊 Stats Counter"]
  F --> G["🔗 CTA Section"]
  G --> H["📄 Footer"]
```

6.3 Services — [services.html](file:///e:/saleem%20shipping/services.html)

```
graph TD
  A["🔗 Navbar"] --> B["📄 Page Hero"]
  B --> C["📋 Services Overview Cards"]
  C --> D1["📄 Custom Clearance Detail"]
  D1 --> D2["🌐 Global Sourcing Detail"]
  D2 --> D3["🚚 Door to Door Detail"]
  D3 --> D4["🚢 Sea Shipping Detail"]
  D4 --> D5["🏢 Warehouse Solutions Detail"]
  D5 --> E["🔗 CTA Section"]
  E --> F["📄 Footer"]
```

[!TIP]
Service detail sections use alternating layout (image left/right) via CSS `direction: rtl` on even children for visual variety.

6.4 Contact Us — [contact.html](file:///e:/saleem%20shipping/contact.html)

```
graph TD
  A["🔗 Navbar"] --> B["📄 Page Hero"]
  B --> C["📄 Contact Grid"]
  C --> C1["Left: Contact Form<br/>Name, Email, Phone, Service, Message"]
  C --> C2["Right: Info Cards<br/>Address, Phone, Email, WhatsApp, Hours"]
  C2 --> C3["Google Maps Embed"]
  C --> D["🔗 CTA Section<br/>Call Now + WhatsApp"]
  D --> E["📄 Footer"]
```

7. Shared Components

These elements are reused across all 4 pages:

Component	Description
Loader	Animated ship + progress bar + brand name
Nav bar	Logo + 4 nav links + Get Quote CTA + hamburger (mobile)
Footer	4-column grid: brand, quick links, services, newsletter
WhatsApp FAB	Fixed bottom-right floating action button
CTA Section	"Ready to Ship?" banner with two action buttons
Particles	Dynamically generated floating dots via JS

8. Animation & Interaction Map

```
graph LR
    subgraph "Page Load"
        L1["Loader animation"] --> L2["Loader fade-out"] --> L3["Hero text stagger"] --> L4["AOS init"]
    end

    subgraph "Scroll Events"
        S1["Navbar solidify"]
        S2["AOS element reveals"]
        S3["Stats counter trigger"]
        S4["Hero parallax"]
    end

    subgraph "Mouse Events"
        M1["Card 3D tilt"]
        M2["Hero glow follow"]
        M3["Button hover effects"]
        M4["Card hover lift"]
    end

    subgraph "Timed Events"
        T1["Testimonial auto-slide (5s)"]
        T2["Ship sail animation (25s)"]
        T3["Wave animation (8s)"]
        T4["Particle float (10-25s)"]
    end
```

9. Performance Considerations

Area	Approach
No external JS libs	Custom AOS, counter, slider — zero dependencies
CSS-first animations	Keyframes for continuous animations (waves, particles, ship)
IntersectionObserver	Efficient scroll detection vs scroll event listeners
Lazy loading	Google Maps iframe uses loading="lazy"
Font loading	display=swap on Google Fonts prevents FOIT
Video optimization	External CDN for hero video, muted + playsinline for autoplay
Minimal DOM	Particles generated only in visible containers

10. External Dependencies

Resource	Source	Used In
Google Fonts	fonts.googleapis.com	All pages (Outfit, Inter)
Hero Video	static.videezy.com	Homepage hero background
About Image	images.unsplash.com	About page intro section
Google Maps	google.com/maps/embed	Contact page map
WhatsApp API	wa.me link	WhatsApp floating button

[!IMPORTANT]
All external resources are loaded via CDN. For production, consider self-hosting fonts and replacing the stock video/image with branded assets.

11. Color & Design System Visual

COLOR PALETTE

	#0a1628	Dark Navy (Primary BG)
	#132244	Navy Light (Alt BG)
	#1a2d5a	Navy Mid (Accents)
	#ff6b2b	Orange (Primary Accent)
	#ff8c4b	Orange Glow (Hover)
	#e55a1b	Orange Dark (Pressed)
	#ffffff	White (Text)

GLASSMORPHISM

Background: `rgba(255,255,255, 0.06)`
Border: `rgba(255,255,255, 0.12)`
Backdrop-filter: `blur(10px-20px)`

TYPOGRAPHY

12. Future Enhancement Opportunities

Enhancement	Description
Shipment Tracker	Real-time tracking form with API integration

 Form Backend	Connect contact form to EmailJS, Formspree, or custom API
 i18n	Multi-language support (Arabic, Hindi, etc.)
 PWA	Service worker + manifest for offline capability
 Analytics	Google Analytics / Tag Manager integration
 Custom Assets	Replace stock video/images with branded photography
 GSAP Upgrade	Add GSAP ScrollTrigger for more cinematic scroll animations
 CMS	Headless CMS for testimonials, blog, and dynamic content
